SUTURE KIT

Parts identification:

1. Suture pad
2. Suture pad holder
3. Scalpel surgical blades (qty 5)
4. 2/0 suture (qty 5)
5. 3/0 suture (qty 5)
6. Carrying Case
7. Scissors
8. Needle driver
9. Scalpel handle
10. Curved needle driver
11. Toothed tweezer

Assembly Instructions:

Follow these instructions to install and remove the surgical blade.

1. Gather supplies and put on gloves.
2. Open the scalpel blade wrapper. Look for the end with a split in the wrapper to ensure you open the dull end.
3. Remove the blade from the wrapper using a pair of needle drivers. Never handle the scalpel blade with your fingers.
4. Align the edge of the scalpel blade to the edge of the scalpel handle. Do not insert the blade backwards. Look for the alignment of the handle to scalpel blade.
5. As you slide the blade down, it will fall into the small grooves in the scalpel handle. Keep moving the blade down until it clicks into place.
6. Clamp the base with a pair of needle drivers to remove the blade. Lift the base of the blade slightly and begin to push it off the handle. Make sure that no one is in front of you as you remove the surgical blade.
7. Once removed, discard the used blade in a sharps container.
