

Wound Care Simulator

Quick Start Guide

The Wound Care Simulator is a hands-on tool designed to help students safely practice essential wound care procedures. This simulator offers immersive learning that mirrors real-world patient care. Students gain confidence and competence as they clean, dress, and assess wounds in a controlled environment, reinforcing critical thinking and decision-making skills.

Product Includes:

- 6 wounds
- Fluid reservoir
- 60-mL syringe
- Downloadable curriculum
- 1-year limited warranty

Abrasion

**Pressure
Wound**

Incision

Laceration

Burn

WARNING: For educational use only.

WOUND CARE SIMULATOR

Set-up Instructions

1. Fill the fluid reservoir with water and draw the water into the syringe.

Optional: Add food coloring for enhanced realism.

NOTICE: Do not use blood simulant with this product.

2. Connect the syringe to the tubing and push the water through until it reaches the end of the barbed fitting in the center of the wound frame.

3. Gently press your chosen wound into the wound frame.

4. Slowly inject water into the tubing until the wound "bleeds" the desired amount.

Cleaning Instructions

- Squeeze as much fluid out of the wound as possible
- Empty the syringe and use it to push air through the tubing until all the fluid is removed
- Empty the wound frame in a sink
- Dry the wounds, wound frame, and case with towels or allow them to air-dry

NOTICE: Do **not** use Vaseline or excessive alcohol (use no more than 70% isopropyl alcohol). These substances may damage the paint.
