

Wearable Auscultation Trainer

Sole Source Statement

This is to certify that Realityworks, Inc. is the sole source of the Wearable Auscultation Trainer possessing the following characteristics and features:

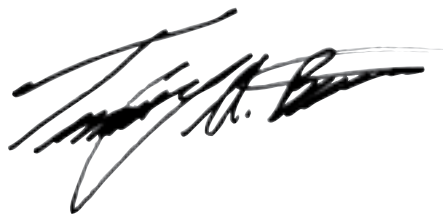

- Quick start guide
- Downloadable curriculum and slide presentations
- 1-year limited warranty
- Garment bag
- RealityScope that attaches to any stethoscope
- Smart device with app
- Sounds play only when RealityScope is placed over corresponding auscultation sites
- Demonstrate auscultation sounds to a group by listening through the app, or test individual students' knowledge by listening through the RealityScope
- App is programmed with 21 sounds and over 40 scenarios, such as bradypnea, hyperactive bowels, and systolic murmurs
- Trainer helps students learn to recognize sounds (and make important language connections):
 - "High-pitched rushing sounds" (hyperactive bowel sounds)
 - "Low-pitched, loud bubbling and gurgling sounds" (Coarse crackles)
 - "High-pitched scratchy sound" (Cardiac friction rub)
 - "High- or low-pitched squeaky sounds" (Wheeze)
 - "Low-pitched coarse grating sound" (Pleural friction rub)

Realityworks is the originator of the Wearable Auscultation Trainer and holds all copyrights and patents to it.
