AIRWAY SUCTION TRAINER

Parts identification:

1. Airway Suction Trainer
2. Removable face half
3. Transparent plate
4. Bronchus with clasp
5. Oral suction handle
6. Nasal suction catheter
7. Tracheostomy suction catheter
8. Lubricant packet

Assembly instructions:

1. Gather the trainer, bronchus, and clasp

2. Squeeze one packet of lubricant into the bronchus

3. Slide the bronchus onto the copper fitting

4. Slide the bronchus clasp up around the copper fitting and tighten

5. Attach the transparent plate by aligning the pins and pressing the plate into the side of the trainer

6. Attach the face half by aligning the pin and pressing the face half into the side of the trainer

Care and Cleaning instructions:

1. Release the bronchus clasp, then grab the bronchus and pull it straight out from the bottom of the trainer.
2. Bring the bronchus to a sink and fill it with hot water.
3. Plug the top of the bronchus with your thumb and swish the water around, then dump it out. Repeat this 5 times. Use a brush on the bronchus if needed.
4. Clean the esophagus from the bottom of the trainer with a brush as needed. **NOTE:** Do not immerse the simulator itself in fluids of any kind.
5. Wipe the simulator skin, mouth, and nose areas with a slightly damp cloth, then pat it dry with a clean cloth. Allow all parts to dry overnight.
6. Reattach the dry parts by following the assembly instructions above.
7. Store the simulator in a dry and warm place out of direct sunlight.
8. Only use the simulator on a clean surface. Avoid ink pens, felt-tip markers, acetone, iodine, or other staining products. Do not place the simulator on newsprint or inked lines of any kind.
