- T-shirt
- Cloth diaper
- Swaddling garment
- Storage Bag
- Brain and Cerebral Arteries Model
- Downloadable curriculum
- 5-year warranty

Student instructions:

Practice swaddling the baby

1. Power on the simulator by pushing the button on the back of the baby until you feel it click and the power light above it turns on.

Note: When the battery is low, all lights in the head will flash and the simulator won't cry.

2. Lay the simulator on the swaddling garment, aligning its shoulders with the top of the open wrap.
3. Tuck the simulator's legs inside the leg pocket and open the tab at the top of the leg pocket.
4. Wrap the left wing over the simulator's torso and tuck it under the simulator's opposite arm.
5. Secure the tab on top of the leg pocket.
6. Place the right wing over the left and secure the opened tabs on left wing's fabric patch. Wings should be snug over the simulator's chest.

Note: Always place babies on their backs to sleep.

7. Pick up the simulator and rock it gently until it stops crying. Crying will cease after 30 seconds if swaddled correctly.

Additional help and information

Online Product Support

We're here to help! Our online Product Support features video tutorials, downloadable documents, frequently asked questions, and product notices, all of which make it easy for you to get support for products, software, and more, day or night.
